PRESS RELEASE

Accurate, affordable mass flow controller for gases and liquids

Bronkhorst High-Tech BV, specialists in low flow measurement and control, designed a new series, CORI-FLOW, mass flow metering instruments to provide high accuracy (up to $\pm 0,1\%$ FS plus $\pm 0,2\%$ of Reading).

CORI-FLOW utilises a patented, advanced Coriolis type mass flow sensor to achieve unsurpassed performance, even with changing operating conditions in pressure, temperature, density, conductivity and viscosity.

CORI-FLOW is offered with or without integral control valve and analog and digital communication, RS-232 with Profibus-DP or DeviceNet.

There are 4 compact models covering flow rates from 20 g/h up to 600 kg/h.

The instruments are suited for a variety of applications in semiconductor processing, food and beverage industries and (petro-) chemical installations.
