EL-FLOW Prestige FG-111BP (P-Insensitive)

High Performance Mass Flow Meter for Gases

Gas Mass Flow Meters for low flow rates

Bronkhorst* model FG-111BP High Performance Mass Flow Meters (MFMs) are suited for precise measurement of flow ranges between $0.14...7 \, \text{ml}_n$ /min and $0.4...20 \, \text{l}_n$ /min at operating pressures between vacuum and 100 bar. The MFM consists of a <u>thermal mass flow sensor</u> and a microprocessor based pc-board with signal and fieldbus conversion and a PID controller for optional mass flow control by means of a separately mounted control valve.

EL-FLOW[®] Prestige series are equipped with a digital pc-board, offering high accuracy, excellent temperature stability and fast response. The main digital pc-board contains all of the general functions needed for measurement and control. In addition to the standard RS232 output the instruments also offer analog I/O. As an option, an on-board interface can be mounted to provide CANopen[®], DeviceNet[™], EtherCAT[®], PROFIBUS DP, PROFINET, Modbus RTU, ASCII or TCP/IP, EtherNet/IP, POWERLINK or FLOW-BUS protocols. The EL-FLOW[®] Prestige design features standard Multi Gas / Multi Range functionality, providing (OEM-) customers with optimal flexibility and process efficiency.
