IN-FLOW F-132MI

High-Pressure Mass Flow Meter for Gases, Industrial Style

Gas Mass Flow Meters for medium flow rates

Bronkhorst[®] model F-132MI Mass Flow Meters (MFMs) are suited for precise measurement of flow ranges between $0,3...15 I_n$ /min and $5...250 I_n$ /min at operating pressures up to 350 bar. The MFM consists of a thermal mass flow sensor and a microprocessor based pc-board with signal and fieldbus conversion and a PID controller for optional mass flow control by means of a separately mounted control valve. The IN-FLOW model is of rugged design (IP65) for use in industrial environments or even Zone 2 hazardous areas, with optional ATEX Cat. 3 or FM Class I, Div. 2 approval.

IN-FLOW series are equipped with a digital pc-board, offering high accuracy, excellent temperature stability and fast response. The main digital pcboard contains all of the general functions needed for measurement and control. In addition to the standard RS232 output the instruments also offer analog I/O. As an option, an on-board interface can be mounted to provide CANopen[®], DeviceNet[™], EtherCAT[®], PROFIBUS DP, PROFINET, Modbus RTU, ASCII or TCP/IP, EtherNet/IP, POWERLINK or FLOW-BUSprotocols.
