

ABOUT BRONKHORST INDIA

BRONKHORST INSTRUMENTATION INDIA

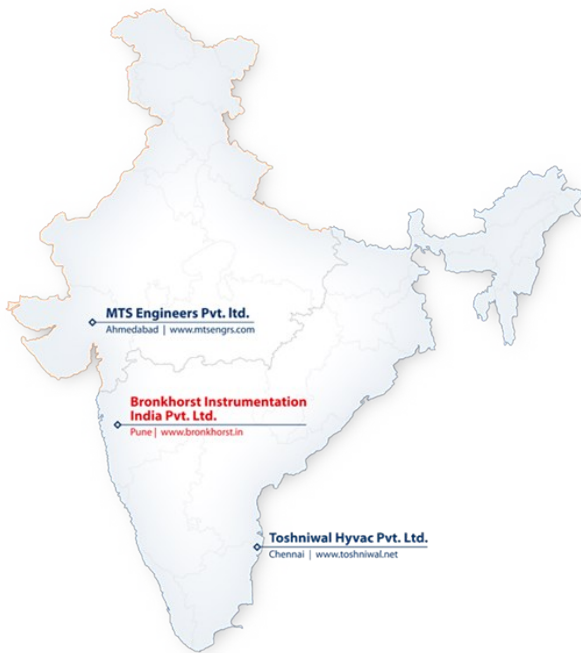

Leader in Low-Flow Fluidics Handling Technology

Bronkhorst Instrumentation India is a wholly owned daughter company of **Bronkhorst High-Tech B.V.** of the Netherlands and offers local sales and after-sales support, calibration and service facilities, application engineering and user training courses. Product expertise includes gas and liquid mass flow measurement and control, pressure measurement and control, vapour generation systems and calibration equipment.

Presence in India

Bronkhorst is already present in the Indian market since 1984 by representation. The opportunities of the nowadays market in India and its development made us decide to start our own entity, to boost the development of our presence on the Indian market, together with our partners, delivering sales and after sales support to global standards. With this step, Bronkhorst pursues its commitment towards the Asian market, where our company already has subsidiaries in Japan, China, Hong Kong, Taiwan, South Korea and Singapore.
